Stainless Steel Submersible Pumps

Performance range at 60 Hz

4PWS

4" Stainless steel submersible pump

Features

The Pearl 4PWS range of submersible pumps are made of corrosion and abrasion resistant stainless steel and have been developed in accordance with state-of-the-art technology. The 4PWS pumps are manufactured to the highest standards for energy efficiency, dependable performance, rugged construction, and long service life.

- Recommended range from 2 - 87 gpm / 0.3 - 21 m³/hr
- Head up to 1180 ft (360 m)

Applications

- Potable water supply from deep wells
- Agricultural-Irrigation, livestock watering, etc.
- Municipal and Industrial
- Pressure boosting
- Fountains, etc.

Pumped Liquids

- Clean water and any non -abrasive liquid compatible with the material components.

Operating Conditions

- Max. ambient temperature (Liquid): 86°F (30°C)

Features

- Stainless steel construction designed and built for years of trouble free operation
- All metal parts are made of 304 stainless steel, except for the shaft, which is made of 431 stainless steel
- Heavy duty stainless steel discharge head with built-in check valve for long life and ease of installation
- Smooth safety hook
- Mounting specifications are according to NEMA standards
- High quality shaft bearings providing low friction and high wear resistance
- Heavy duty stainless steel impellers & diffusers ensuring optimal performance
- Stainless steel strainer to restrict the entry of sand and other extraneous material

4" Stainless steel submersible pump

16	Nut	Stainless Steel	304

6PWS

6" Stainless steel submersible pump

Features

The Pearl 6PWS stainless steel submersible pumps are made of high quality 304 or 316 corrosion resistant stainless steel. Shafts are made of high strength 431 stainless steel. The pumps are designed for efficient and dependable performance, and long and trouble-free life. The pumps are light in weight and ruggedly constructed for heavy duty applications.

- Recommended range from 30 - 350 gpm / 6 - 90 m³/hr
- Head up to 1780 ft (545 m)

Applications

- Potable water supply from deep wells
- Agricultural-Irrigation, livestock watering, etc.
- Municipal and Industrial water supply
- Pressure boosting
- Fountains, etc.

Pumped Liquids

- Clean, non corrosive and non-abrasive liquids.

Operating Conditions

- Max. ambient temperature (Liquid): 86°F (30°C)

Features

- Stainless steel construction designed and built for years of trouble free operation
- Heavy duty stainless steel discharge head with built-in check valve for long life and ease of installation
- Mounting specifications are according to NEMA standards
- High quality shaft bearings providing low friction and high wear resistance
- Heavy duty stainless steel impellers & diffusers ensuring optimal performance
- Stainless steel strainer to restrict the entry of sand and other extraneous material

8PWS

8" Stainless steel submersible pump

Features

The Pearl 8PWS submersible pumps are designed for heavy duty and high volume pumping application. Highly efficient hydraulic impeller and diffuser designs reduce energy requirements and provide long and dependable service life, even in difficult environment.

- Recommended range from 150 - 650 gpm / 18 - 150 m³/hr
- Head up to 1340 ft (408 m)

Applications

- Municipal water supply and distribution
- Municipal water treatment
- Industrial-for irrigation, etc.
- Pressure boosting in high rise buildings, etc.
- Dewatering in mines
- Fountains, etc.

Pumped Liquids

- Clean water and any non -abrasive liquid compatible with the material components.

Operating Conditions

- Max. ambient temperature (Liquid): 86°F (30°C)

Features

- High pump efficiency means lower energy consumption and thus lower operating costs
- Designed and built to operate under difficult conditions
- High quality materials and high quality workmanship assure high quality pumps
- All metal parts are made of 304 stainless steel, except for the shaft, which are made of 431 stainless steel
- 431 stainless steel pump shaft assure strength with resistance to mechanical wear and corrosion
- High quality shaft bearings providing low friction and high wear resistance
- Heavy duty stainless steel discharge head with built-in check valve for long life and ease of installation
- A high strength stainless steel coupling facilitates a proper pump/motor alignment
- Mounting specifications are according to NEMA standards

8" Stainless steel submersible pump

10PWS

10" Stainless steel submersible pump

Features

The Pearl 10PWS stainless steel submersible pumps are made of high quality 304 or 316 corrosion resistant stainless steel. Shafts are made of high strength 431 stainless steel. The pumps are designed for efficient and dependable performance, and long and trouble-free life. The pumps are light in weight and ruggedly constructed for heavy duty applications.

- Recommended range from 100 - 1500 gpm / 20 - 335 m³/hr
- Head up to 1795 ft (547 m)

Applications

- Municipal water supply and distribution
- Municipal water treatment
- Industrial - Cooling, cleaning and production
- Agricultural - Irrigation and livestock watering
- Pressure boosting in high rise buildings, etc.
- Dewatering in mines
- Fountains, etc.

Pumped Liquids

- Clean water and any non -abrasive liquid compatible with the material components.

Operating Conditions

- Max. ambient temperature (Liquid): 86°F (30°C)

Features

- High pump efficiency means lower energy consumption and thus lower operating costs
- Designed and built to operate under difficult conditions
- High quality materials and high quality workmanship assure high quality pumps
- All metal parts are made of 304 stainless steel, except for the shaft, which are made of 431 stainless steel
- 431 stainless steel pump shaft assure strength with resistance to mechanical wear and corrosion
- Heavy duty stainless steel discharge head with built-in check valve for long life and ease of installation
- A high strength stainless steel coupling facilitates a proper pump/motor alignment
- Mounting specifications are according to NEMA standards
