**C2**

## C2 Composite Series | Serie C2 Fibra

### Tank Applications

The **C2 Composite Series** tanks provide the proven performance of a steel tank in a lightweight design. Efficient and cost effective, the **C2 Composite Series** are designed with a patented controlled action diaphragm.

Unlike other composite tanks that hide old bag technology in a plastic shell, our diaphragm design is stronger and will not crease and wear out. Easy to install, weather resistant and engineered to withstand even the most extreme environmental conditions.

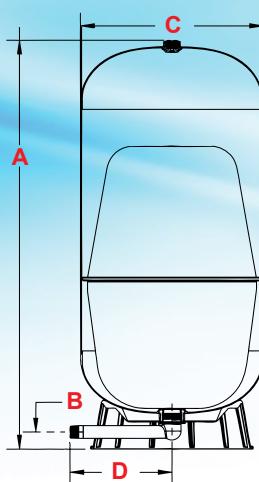

### Aplicaciones del Tanque

La **Serie C2 en Fibra**, ofrece los ya comprobados rendimientos de la serie MC en acero, pero con la ventaja de un tanque mucho más liviano y manejable. Están construidos usando la tecnología CAD2 o membrana de acción controlada. A diferencia de otros tanques de composite del mercado, la incorporación de la tecnología CAD2 lo hace un tanque más resistente y con menos desgaste a través del tiempo.

Los tanques de la **Serie C2 FIBRA** son fáciles de instalar, resistentes a la corrosión y diseñados para soportar condiciones ambientales extremas.

- Patented CAD2 diaphragm technology
- Durable continuous strand fiber glass sealed with epoxy resin
- Rugged copolymer polypropylene base
- No maintenance

- Sistema patentado CAD2
- Tela de fibra de vidrio de alta resistencia sellado con resina epóxica
- Base en propileno
- No requieren mantenimiento
